

***DEAR AUTHORS AND READERS OF THE
JOURNAL «ECONOMIC HERALD OF SHEI USUCT»***

Thank you for the opportunity to address you with an introductory speech on the pages of this journal and at the end of this unusual year 2020. I know how this journal was created and I am pleased to see its improvement and a steady increase in the quality of publications and the number of authors.

2020 brought us a lot of changes and proved to us that humanity cannot evolve without research in various fields of science. Therefore, we can confidently say that research and science projects in the field of economics and marketing are extremely necessary for today, given the need for many enterprises to move to a completely new virtual environment.

Dear scientists of the «ECONOMIC HERALD OF SHEI «UKRAINIAN STATE UNIVERSITY OF CHEMICAL TECHNOLOGY»! I would like to thank all of you for the opportunity to get acquainted with the latest research in such areas as finance and banking, energy and metallurgy, budget management and decentralization of modern economic education and European integration.

I sincerely wish all scientists inspiration and new achievements. Also I wish readers to enjoy the scientific publication and use the experience of scientists for further research.

With best wishes,

Vitalina Komirna

*Dr. Sc. (Economics), Professor, Dean of the faculty of socio-medical sciences,
European social-technology University, Radom, Poland*
